

COURSE ANNOUNCEMENT

FEMA Debris Management Course G-202

November 17-19, 2009
8:00 a.m. to 5:00 p.m. daily

This three day course is intended for government staff and decision makers and others involved in various aspects of post event and disaster debris removal and operations. Recommended attendees include personnel from public works, waste management, parks and recreation, health and environment, road and bridge, city and county administrators and managers, finance and procurement, and emergency planners. The course provides an overview of the actions and plans necessary to prepare for, respond to, and recover from debris-generating events.

****FEMA instructors will facilitate the class.****
